EXPERIENCE

ThoughtWorks
Software Developer

JAN 2017 - PRESENT   SYDNEY, AU

➢ Helped deliver an iOS and web application for one of Australia's leading energy company, resulting in visibility of assets worth over 2 million AUD. Technical stack included React.js, React Native, Node.js, AWS Lambda and Google Analytics.
➢ Contributed to development of a government website focused on accessibility and dynamic content. Technologies included React.js, Drupal8, and GraphQL.
➢ Developed and project managed an internal ruby on rails application used by 300+ employees for automating leave process. The result saved 900+ hours of manual admin work and better experience for end-users.
➢ Advised two major non-profit organizations on value-driven portfolio management, visual systems, agile methodology, and design-thinking through interviews and workshop facilitation.
➢ Attended 5-week immersive training on agile delivery and development best practices including TDD, pair programming and clean code.

Leezair
Front-end Developer

OCT 2017 - DEC 2017   SYDNEY, AU

➢ Supported development for Leezair, a Sydney-based startup offering a digital marketplace for leisure experiences in Australia.
➢ Contributed to the release of Leezair's iOS and Android mobile applications, built with Ionic 2. Technologies included Angular 2, Ionic 2, TypeScript, PHP, SASS, Cordova, Gradle, Xcode, Android Studio, HockeyApp
➢ Worked closely with the design and development team to deliver an attractive user interface and useful native experience.

General Assembly, Sydney
Full-stack web development

JUNE 2016 - AUGUST 2016   SYDNEY, AU

➢ 12-week full-time immersive course in web development. Course focused on developing web applications
➢ Developed travel sharing web application with JS, HMTL, CSS, Ruby on Rails, Cloudinary, GoogleMaps API, Facebook API
➢ Conducted user research to design a system for storing recipes and built a solution with Google Chrome Developer Tools- Extension, Nokogiri web scraping, and Ruby on Rails
➢ Built an Iot system and web application for tracking water consumption with a cell load, arduino, and HX711 sensor for hardware, and JS, Ruby on Rails, Python, SASS, SendPulse and Highcharts.js for software

Checkmate Technologies
Product Partnerships Manager

APRIL 2015 - APRIL 2016   SAN FRANCISCO, CA

➢ Initiated and managed new partner vertical, including prospecting, pitching, contracting, implementation and account management
➢ Worked with external product/eng teams on API integrations
➢ Analyzed partner data for marketing metrics and kpi tracking

Trello

Visual Systems– Kanban

Booking.com (USA)
Key Account Manager

MARCH 2012 - MARCH 2015   SAN FRANCISCO, CA

➢ Managed performance of key San Francisco hotel accounts producing $65+ million in annual revenues
➢ Generated $12+ million in profits by applying deep product knowledge to optimize accounts and creating meaningful relationships with key stakeholders

COMMUNITY & LEADERSHIP
